Magnetic charging cable

1. **Long press the home key to start Gululu.** In the case of powering off, please charge it for 20 minutes and try again.

2. Download Gululu App.

3. Finish registering and creating the child's profile as instructed by the App, and select the favored Gululu Water Fairy.

4. Click on「＋」on the right side of Water Fairy and "match" the bottle with the profile of the child.

5. **The bottle shall get restarted automatically after successful match.** The Water Fairy selected by the child will emerge in the screen.

Gululu App

Download on the App Store

GET IT ON Google Play

Scan here

1. **Create profile for the child:** enter the date of birth and the weight of the children. The App shall recommend the proper amount of water intake based on the age and the weight.

2. **Match the bottle:** click on 「＋」 on the right side of the Water Fairy and "match" the bottle with the profile of the child by following instructions. Check water intake history, add friends and download the latest games after successful match.
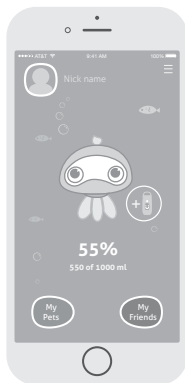

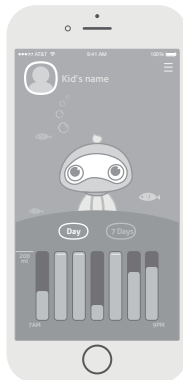

3. **Check the amount of water intake:** the bottle shall get connected to the set Wi-Fi and upload the water intake history onto the Cloud and sync to App.

9. **Game version update:** Gululu releases 1 or 2 games each month. Start the bottle in the set Wi-Fi environment. It will automatically download the latest content! (Please make sure that the power supply is stable, the bottle is turned on and do not move or hold the bottle during installation so as to avoid incomplete installation.)

Q: Should Gululu be turned on?
A: No. The screen of Gululu shall go black and turn into the ready mode if there is no interaction for over 1 minute. After being fully charged, Gululu shall operate for 2 to 3 days under the normal use condition and for 4 to 5 days under the ready mode.

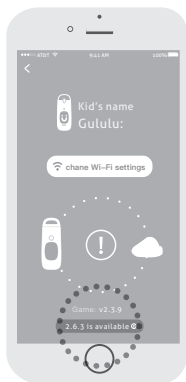

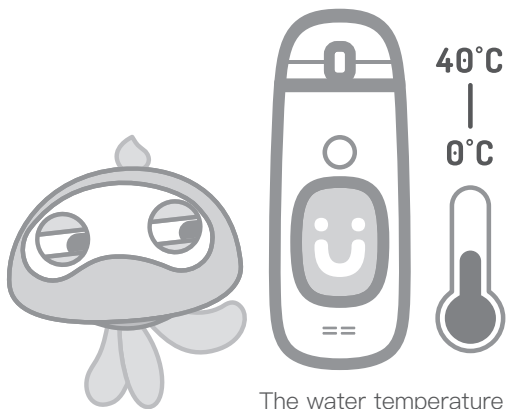

The current and latest versions
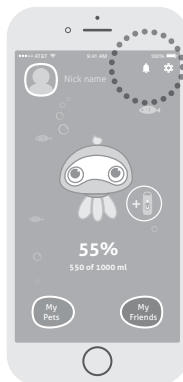

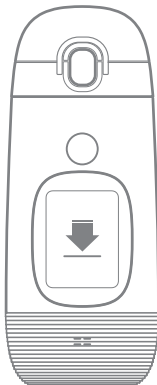

Event notice

10. Water temperature alarm: Gululu is set with the water temperature sensor and shall alarm when the temperature is above 40°C.

40°C

0°C

The water temperature is suggested to be no higher than 40°C.

Power on: long press the home key until the boot animation appears. Pet page: the map that the pet is exploring about. In the top left corner is the level of the pet; at the top of the map is the daily water intake process; in the top right corner is the height (10m, 20m …) which the pet reaches in the map; in the bottom left corner is the creature at this height and the gems it produces. Navigation page: click on the home key in the pet interface to get redirected to the navigation page and the sub-pages in it. System setting page: long press the home key in the pet interface to get redirected to the system setting page and check the ID, adjust the volume and power off.
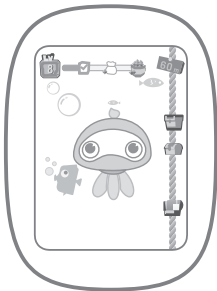

Pet page   Navigation page   System setting page

Interaction in the pet page: slide the right side of the bottle to give play to the skills of the pet; and slide the left side to ascend or descend to the unlocked areas in the map.

The water intake process bar shows the amount of the water that has been drunk. When the process reaches the spot of gems, the gems can be unlocked. The process bar shall be cleared every morning and restart.

FCC Caution.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
